

PHASE

## PLANE HELL ACTION

Campaigning for Relief from Plane Hell over South East London

“I agree (with her) that we need to do all we can,  
to mitigate the  
impacts of aircraft noise and, with this in mind it is  
our policy (is) to limit and, where possible, reduce  
the number of people affected by it in the UK”

Baroness Sugg September 2018

*This sentiment and the use of the term “affected” are just wrong*

## PHASE

5 days ago ...

The concentrated flight path creates unbearable, loud, continual noise interruption, preventing basic quiet enjoyment of our home and garden and preventing us from sleeping more than 5 hours a night.

***This noise infliction over SE London, at an average of 15 NM from LHR is not acceptable Baroness!***

PHASE

*How can this be happening to us in SE London?*

PPR = Permanent and Planned Redistribution (of traffic)

“there is a **permanent change to the number of flights using an existing flight path**, and “aircraft operational changes to airspace usage” which covers shifts over time in the distribution of flights over particular routes.

From your description of your circumstances and your recent joint report with HACAN, I believe you may be experiencing one of these situations.”

DfT

## PHASE

7 days ago ...

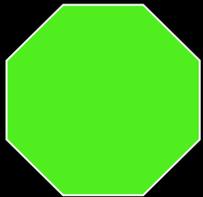

I am woken at 4.35 with the reverberating noise of the first plane going overhead, there is not more than a few minutes peace from this time until late into the night. I no longer want to sit in my garden, I work and study from home, the droning accompanies me on my dog walk, it is incessant. How is this level of noise and disturbance acceptable?

*Can we really tell him that it is because of PPR and least number of people affected policy?*

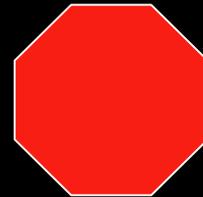

# CAA Air Navigation Guidance 2017

*Yet another consultation that*

- Enables DfT to ring-fence red-zones of aviation noise in SE London
- Had *only* 113 responses
- Was not *really* publicised

*A green light to red zoning  
after only 113 responses?*

## PHASE

2 weeks ago ...

Where is this balance btw aviation & the environment?

There isn't any is there.

Huge expansion is planned at many airports.

I'm over 20 miles from LHR outside the noise contour map[Wallington] but plane noise invades every sq/ft of my home from 4.30am till 11.30pm every day on westerly ops, approx 75% of the year.

It is infuriating that every morning i'm awoken at 4.20am & can't go to sleep till past 11.30pm. By the time i nod off that's just 4 hours sleep a night.

Enough is enough, you are destroying peoples quality of life.

## PHASE

- 113 Air Navigation Guidance responses from where exactly?
- 928 Plane Hell Action petition signatures from SE London.

“We are undertaking further work on PPRs to ensure that any new arrangements are **suitable and reflect the need to be proportionate** in addressing those permanent and planned redistribution of air traffic events which have a significant noise impact and not to cover the very large number of air traffic control operational changes which take place each year and may have no such impact. We anticipate that new policy in this area would take effect in 2019.”

DfT ....

*BAFFLED ? Petition signees can speak plainly .....*

## PHASE

May 2018 ...

I'm signing because I want to achieve at least 7 hours sleep, the minimum recommended by WHO (World Health Organisation) for good health, and ban all flights between 11pm - 6am (better still 7am) under all circumstances apart from mayday emergencies.

To ensure any remaining night routes avoid populated areas to mitigate the impact of aircraft noise.

**Noise mitigation should be the key issue up to at least 7000 feet for any plane flying below this.**

To keep aircraft higher for longer by utilising Continuous Descent For approaches which reduce noise because they require less engine thrust and keep planes above 6000 feet.

**To stop aircraft concentrating over residential areas and adopt multiple routes to avoid concentration of planes over particular communities.**

To stop the impact on mental and physical health caused by aircraft noise and aircraft pollution flying low over residential areas and keep planes above 6000 feet.

To take the whine out of arriving aircraft.

## THE POLICY PARADOX

**QUIET(ER) PLANES =>  
OVERFLIGHT CAN BE PART OF OUR LIVES =>  
POLICY OF LEAST NUMBER OF (NEW) PEOPLE OVERFLOWN IS  
IRRELEVANT.**

**V**

**LEAST NUMBER OF (NEW) PEOPLE OVERFLOWN IS RELEVANT  
=>  
PLANES ARE NOT QUIET(ER).**

**FLAWED & FALSE POLICIES THAT SELF CONTRADICT**

PHASE

May 2018 ...

QUALITY OF LIFE

Jan 2018 ....

When money is your God you will sell your soul & the health & well being of Joe Public for 30 pieces of Judas Silver.

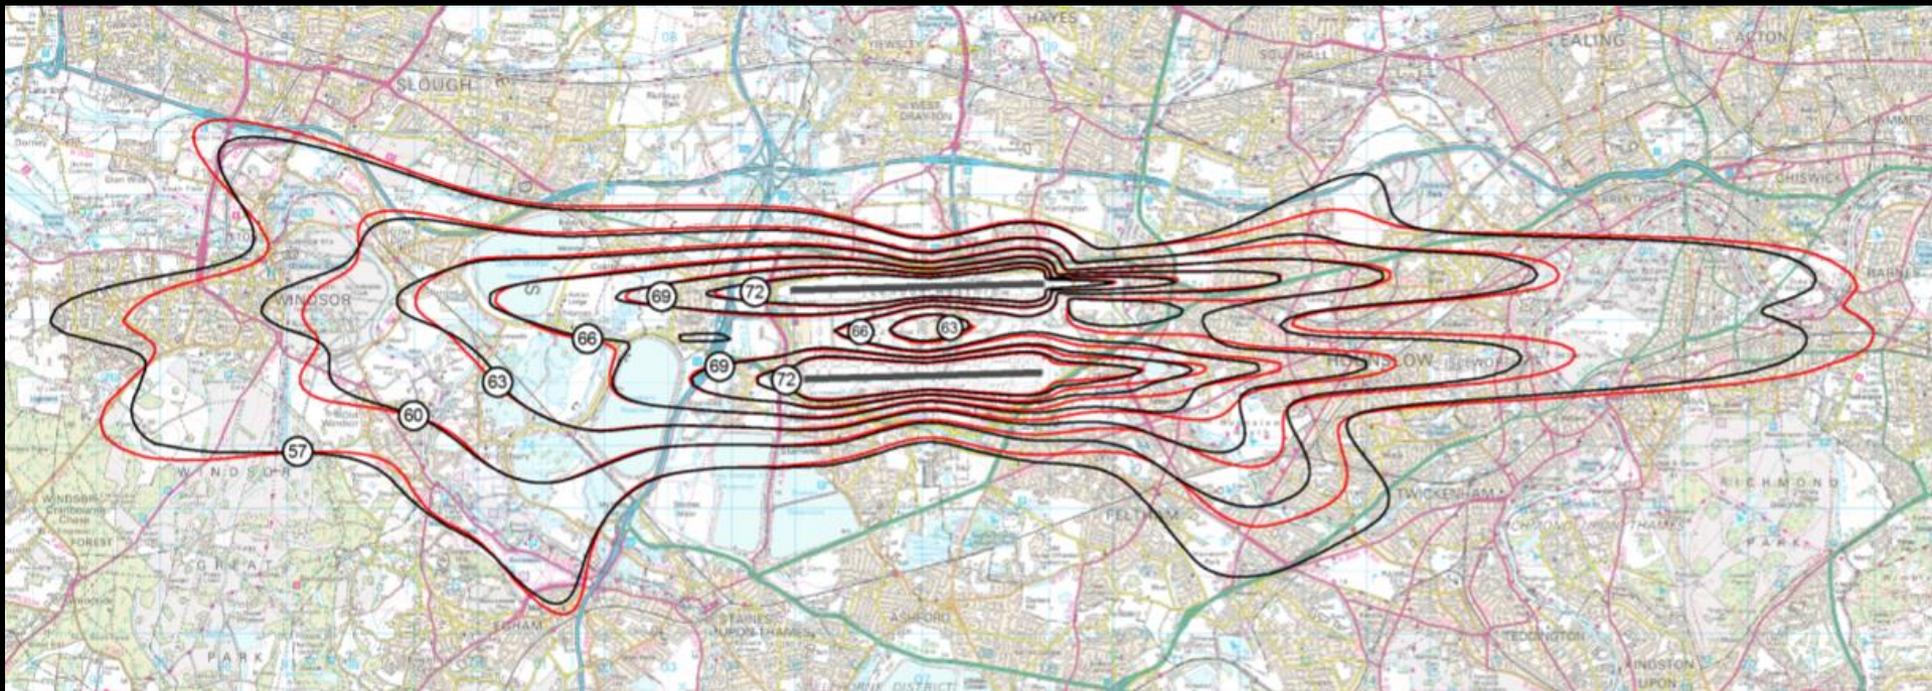

1 year ago ....

I live in Peckham and I have difficulty sleeping. The planes start at 4am in the summer.

At weekends it is **unbearable** to sit in the garden because the planes are flying so low and make so much noise.

The air quality in London is very poor. Flying planes over densely populated areas should be **banned**.

# PHASE

1 year ago ... The constant drone of low flying aircraft is spoiling my home life and interrupting my sleep. Just as one fades out, the whine of the next one approaches.
